PLANT BEGINS RADIOMETER PRODUCTION;
SPUR OUTPUT BY WORK COMPETITION

FAR NORTH SCHOOLS GET PHYSICS INSTRUMENTS -- Leningradskaya Pravda, 12 Aug 50

The trade mark "Elektrodelo" of the Leningrad Elektrodelo Plant is well known to school teachers. It appears on demonstration apparatus and handbooks throughout the country.

The plant has recently increased its output and broadened the range of its products. Among the new items is a radiometer, an instrument for graphic demonstration of the action of heat rays, and a vacuum scale, consisting of a set of glass tubes under different degrees of vacuum. Another interesting device is a high-frequency transformer which produces miniature lightning for class study.

Many interesting physics instruments have been sent to schools in the Far North.

UZBEK OFFICE DECENTRALIZES ELECTRICAL SUPPLY -- Pravda Vostoka, 3 Aug 50

The Uzbek Republic Office of the Main Administration for Sale of Products of the Electrical Industry hereby notifies all ministries, organizations, and enterprises of Union or Republic level that it is converting to the system of decentralized supply, and that in connection with this conversion it is now accepting orders for all electrical installation parts and lighting equipment which will be needed by enterprises during the year 1951. Deadline for the receipt of these orders is 10 August 1950. No orders received after that date will be considered. Address: Uzbek Republic Office of Glavelektrosbyt, Tashkent, ulitsa Stalina, 41. Phone 36-846 or 34-923.

NEW METHOD ELIMINATES REJECTS -- Vechernyaya Moskova, 12 Aug 50

In competitions in honor of the Peace Watch, the Moscow Searchlight Plant won first place in its rayon and third place in the Ministry of the Electrical Industry.

In the course of an economy drive new cutting methods were adopted and waste materials were carefully utilized. Hundreds of kilograms of sheet iron were saved, from which parts were made for the generator shop. This enabled the shop to pledge 25 above-plan generators in August.

A new technology for making transformer coils was worked out which completely eliminated rejects. Rejects under the old method were as high as 50 percent. The new method also doubled labor productivity.

PUT OUT 8,000 BULBS PER SHIFT -- Moscow Komsomol'skaya Pravda, 3 Aug 50

One brigade at the L'vov Electric Bulb Plant, which consists of 30 young men and women, turns out 8,000 bulbs per shift. Its norm is 5,750 bulbs.

MAKES GENERATOR STABILIZERS -- Moskovskiy Komsomolets, 5 Aug 50

The Moscow Electrical Machinery Plant of Glavsel'elektro (Main Administration of Electrical Equipment) produces generator stabilizers for rural power stations.
